LIGHT FOR YOUR
COMFORT

A strong network which combines comfort and efficiency for you.

Smart Lighting becomes quite easy with our technological expertise, our leading products and our powerful network. Together with our partners, we are able to meet individual requirements precisely.

Strong partners for your success.

With our network in the area of Smart Lighting and Data Service we offer real added value for your projects. Our partners offer many years of expertise in their field. For solutions that are always technologically leading and that enable smart applications.

Human Centric Lighting, quite simple.

Thanks to our LED control gear units with DALI Device Type 8 (DT8), the HCL configuration becomes efficient and time-saving. As a partner we accompany you all around the world in future topics such as Human Centric Lighting, from the first consultation to the perfect solution.

Always fits perfectly

The solutions of the BAG electronics can always be relied upon. We know our strengths and those of our partners. We have built up a proven and successful competence network that meets your needs quickly, professionally and efficiently.

What can we do for you?

Combine lighting electronics, control gear units and software from the BAG electronics with perfectly matched LED components. Powerful and proven LED modules from SEITEC, innovative chip-on-board modules from Luminus - we select exactly the components that fit 100 percent for your project.

Easy access to new technologies

Our know-how and the expertise of our partner network supports you.

Time and cost savings

Because our products and services fit perfectly to your needs.

Customised solutions

For the desired light at any time, in any color and intensity.

More comfort

From fast commissioning to convenient data monitoring.
